Sewing Instructions

Before starting, make the darts for the bodice and the skirt

1. Place the front and back bodice, right sides facing. Pin the right side and sew along using the longest stitch length on your sewing machine. This will be the side you put the zipper on.

Remember to put the regular setting on your sewing machine after closing this side.

2. Place the zipper at the top of the side seam. Sew it to the bodice.

3. Close the left side of the bodice.

4. Place the armhole facing, right sides facing. Pin and sew along.

5. Turn the facing around and iron flat.

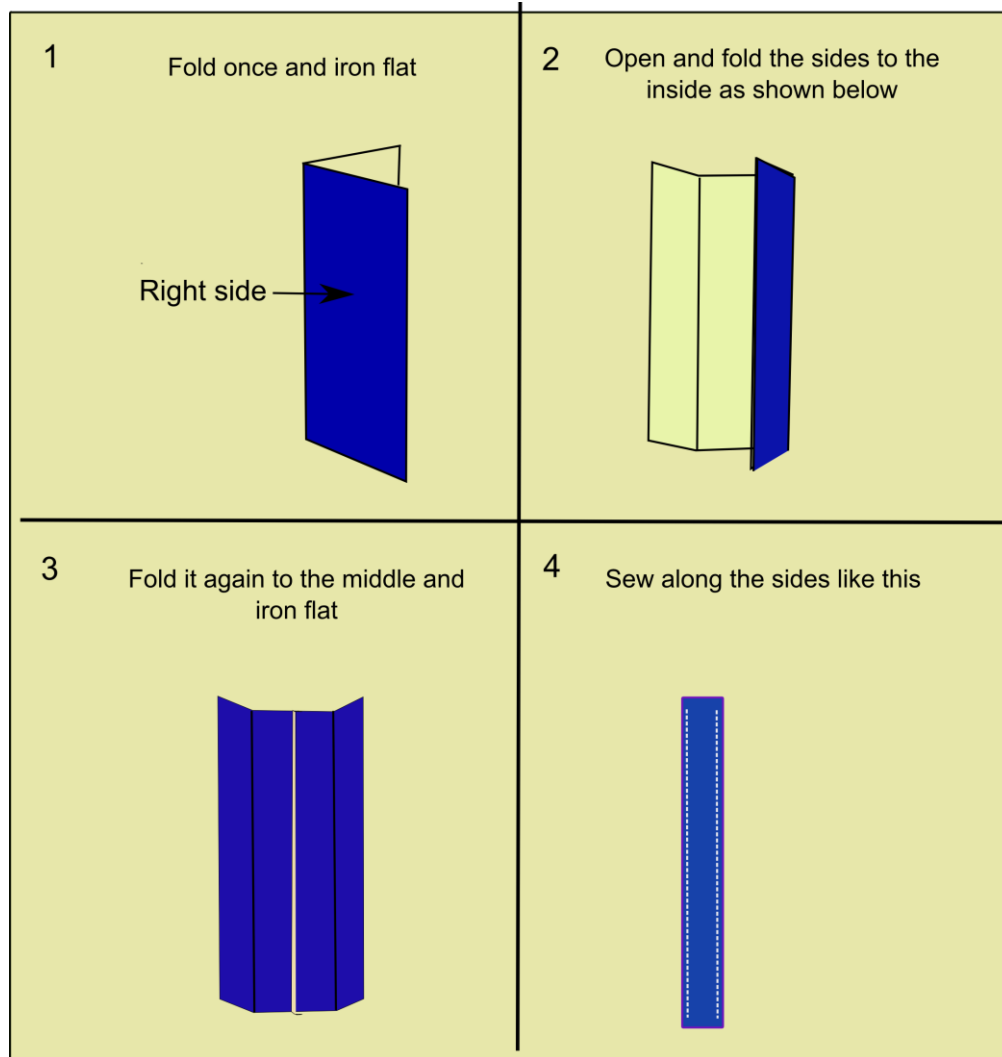

6. Fold the top of the front and back bodice. Pin and sew along.

7. Edge stitch the armhole area.

8. Top stitch the side seams on the right side. This will keep the facing from showing on the outside.

9. Make the strap of the dress:

10. Using a safety pin, insert the strap on the neckline.

11. Skirt: Close the sides of the skirt.

12. Place the skirt and the bodice together, right sides facing. Pin and sew along.

14. Finish your dress by sewing the hemline half inch.
